PROFESSIONAL PROFILE

B.Tech Computer Science and Engineering student at GSFC University, specializing in AI/ML and Data Science, with hands-on academic project experience across web development, Python-based analysis, SQL databases and IoT sensor integration. Seeking an internship in software development, web development, AI/ML or data analytics where I can build practical solutions, strengthen engineering skills and contribute to a collaborative team.

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript, SQL
Web Development: HTML5, CSS3, React (basics), responsive UI
Databases: MySQL, data cleaning and basic analysis
AI / ML: Machine learning fundamentals, data-driven problem solving
Tools: Git, GitHub, VS Code, Arduino IDE, Jupyter Notebook, Streamlit (basics)

SELECTED PROJECTS

AI-Based Smart Sorting Dustbin

Arduino UNO · Python (AI) · Sensors · Prototype

- Designed and developed a smart dustbin using Arduino UNO, ultrasonic and moisture sensors with servo mechanism for automatic waste segregation.
- Implemented basic AI/predictive logic to estimate bin fullness based on sensor data.
- Explored camera-based object detection (laptop webcam) for real-time classification.

Product Inventory & Shopping Cart

React · JavaScript · HTML · CSS

- Built a React assignment focused on product listing, inventory management and shopping-cart interactions.
- Practiced reusable components and state-driven UI for a more interactive user experience.
- Used GitHub for version control and project development.

Personal Portfolio Website

HTML · CSS · JavaScript

- Developed a multi-page portfolio website to showcase my projects, skills and contact information.
- Designed a clean and responsive UI with navigation, project showcase and contact form.
- Implemented interactive elements using JavaScript.

EDUCATION

B.Tech — Computer Science and Engineering (AI/ML & Data Science Specialization)
GSFC University, Vadodara
Expected Graduation: 2028 | Semester 5 | CGPA: 7.00/10

INTERNSHIP INTERESTS

Software Development • Web Development • Frontend Development • Data Analytics • AI/ML
